# About Us

UWA Young Engineers is a student chapter of Engineers Australia at The University of Western Australia. Our organisation is comprised of high-achieving students from all disciplines of UWA's School of Engineering and School of Physics, Mathematics and Computing. This is achieved through a calendar of events consisting of networking evenings, technical talks, engineering competitions and soft skill development sessions.

## OUR MISSION

To promote the professional development of all our club members. We aim to bridge the gap between students and industries.

## OUR REACH

We reach over 80,000+ people across all our social media platforms with over 1000 attendees annually from all of the major universities in WA.

## A NOTE FROM OUR CO-CHAIRPERSONS

**Ziao  
Veneziani**

**Hans  
Benui**

*Since the club's inception back in 1997, UWAYE has continuously provided and delivered high-quality events and initiatives for students and company sponsors from a multitude of industries.*

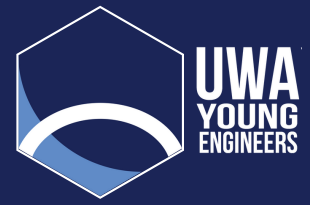

*This year our committee team consisted of 42 students from a diverse range of engineering and STEM based specialisations, and varying stages of their university degrees.*

*During our term, our aim was to expand upon UWAYE's commitment towards the professional development of our committee through the introduction of portfolio teams. Additionally, we also progressed other avenues of our mission through our Schools Outreach program initiative.*

*We cannot thank all of our sponsors enough for their continuous support and collaboration over the last year, and we are excited to continue strengthening our relationships. We will continue to strive to work with organisations to facilitate professional opportunities for all students pursuing a major within the School of Engineering and School of Physics, Mathematics and Computing at The University of Western Australia.*
